### Hygienic

Plastic pallets are non-porous and resistant to moisture, insects, fungi, acids, fats, solvents and odor. Our pallets are inspected after every turn to make sure they meet our quality standards.

### Sustainable

Ultra-durable pallets can be reused for years and outlast wood alternatives. At the end of their lifecycle, they get recycled and remanufactured into new pallets.

### Build for Automation

Because plastic pallets are molded, the sizes and weight are always consistent, causing zero disturbances in your automated material handling systems.
